### **Working in groups:**

1. Each person must select an item of evidence for their crime scene. Each group should have at least one “smaller” piece of evidence and a piece of clothing.
2. Each member of the group is responsible for photographing the crime scene in its entirety (Meaning overall, mid-range, and close up photographs of the crime scene and all evidence. Photographs should be taken with evidence clearly marked, with and without scales. Additional lighting techniques should be utilized as needed).
3. Photography Logs MUST be completed in full detail and submitted to your Google Drive folder for Lab #10.
4. For any small pieces of evidence (as in evidence that fits in the tents), these should be brought back to the lab and photographed again using the light tents to create “examination quality” images for comparison purposes.
5. For the item of clothing, a full clothing examination must be completed, along with complete documentation. This includes a complete set of photographs, detailed notes on the size, brand, and any areas of interest, as well as a sketch of the item of clothing with the areas of interest noted on the sketch.

# Example

## PHOTOGRAPHY LOG

PAGE 1 OF 2

- no matter how many pages it takes label it !!

# Focal length

# Shown  
in Camera

۲

means  
it was  
perfect  
"no comment"

# Example

- T-shirt
- worn on torso
- Maroon, XL, Gildan, T-shirt

- Received right side out
- Cotton

- Closed
- clothing well-worn with multiple holes and a couple stains

- Stain

- Hole
