# Scenario

Case Overview: On November 4th, 2025, Miss Reveille arrived at the Heep Center for work at 6am through the north entrance. He swiped her badge for entry, as the building officially opened at 7:30, and started to make her way to his office in RM 107. When he passed through the first floor lobby she stumbled upon a decedent with multiple bullet wounds. Miss Reveille immediately called 911.

First responders arrived on scene and immediately transported the decedent. He was confirmed dead at the scene. The calculated time of death was determined to be between the hours of 4:15 am and 5:15 am.

You are dispatched to the scene as the crime scene photographers.

### Working in groups:

1. Each person must select an item of evidence for their crime scene. Each group should have at least one “smaller” piece of evidence and a piece of clothing.
2. Each member of the group is responsible for photographing the crime scene in its entirety (Meaning overall, mid-range, and close of photographs of the crime scene and all evidence. Photographs should be taken with evidence clearly marked, with and without scales. Additional lighting techniques should be utilized as needed).
3. Photography Logs MUST be completed in full detail and submitted to your Google Drive folder for Lab #10.
4. For any small pieces of evidence (as in evidence that fits in the tents), these should be brought back to the lab and photographed again using the light tents to create “examination quality” images for comparison purposes.
5. For the item of clothing, a full clothing examination must be completed, along with complete documentation. This includes a complete set of photographs, detailed notes on the size, brand, and any areas of interest, as well as a sketch of the item of clothing with the areas of interest noted on the sketch.

# What you turn in-

All photos taken today. The good, the bad, & the ugly!

Pick your two favorite and upload these to your digital portfolio!

Photo Log + Diagram

Once finished, go ahead and check out the post lab questions for today and check the assignment details of your digital portfolios. You can finish and turn that in today if you've been to every lab so far.
